

Changes to 2023 Annual Notice of Change,
Evidence of Coverage, and Summary of Benefits

This is important information on changes in PrimeTime Health Plan coverage.

This notice is to notify of upcoming changes in coverage due to recent legislation. Below is information describing the changes. Please keep this information for reference. A copy of this notice is available with the Annual Notice of Change (ANOC), Summary of Benefits (SOB), and Evidence of Coverage (EOC) on our website at www.pthp.com.

Part B Rebatable Drugs

Currently you pay 20% coinsurance for chemotherapy drugs, biologicals and other drugs covered by Medicare Part B. **As of April 1st**, if a drug is listed as a Part B Rebatable Drug on the most recent quarterly report published by the Centers for Medicare & Medicaid Services (CMS), then you may pay less than 20% coinsurance. A Part B Rebatable Drug is a drug identified by CMS whose price is increasing faster than inflation. The actual coinsurance percentage will vary based on the cost of your drug, but will NOT be more than 20% coinsurance. This means beginning April 1st, you may pay less than «copay» for certain Part B covered drugs specified by Medicare. You do not need to take any action; we will automatically adjust the amount owed, and the coinsurance may change each quarter.

Insulin for use with an Insulin Pump

Currently you pay 20% coinsurance for insulin used with an insulin pump and covered under Medicare Part B (medical coverage). **As of July 1st**, you will pay no more than \$35 for a one month supply of insulin. This means if you receive insulin pump insulin from a Part B medication provider (see examples below), you will pay no more than \$35 for a one-month supply.

Example Part B medication providers who may supply insulin for a pump:

Davies Drugs	Davies Pharmacy
Valleyview Pharmacy	Brewster Family Pharmacy
Discount Drug Mart	CCS
Edgepark	Medicine Center
Mediwise Pharmacy	Script Shop
